Clement Ho

Software Engineer

Kuching, Sarawak, Malaysia

Summary

As a Software developer, I design and build robust solutions that power real-time monitoring and alerting systems. My expertise lies in crafting high-performance applications with a Python backend and a Vue.js frontend. Previously, I worked on building security and management systems using PHP, gaining valuable experience in system architecture and functionality. Lately, I've been expanding my skill set, diving into Kubernetes, C/C++, cloud architecture, DevOps, and automation to stay ahead in the ever-evolving tech landscape.

Experience

Ryobi-G

Software Engineer

May 2023 - Present (2 years 2 months)

Projects:

- 1. TIMS Tunnel Integrity Monitoring System
- Django rest framework, Vue JS frontend, Azure platform hosting, PostgreSQL
 DB.
- Web Application for DFOS monitoring and alerting.
- Project scaffolding and CI/CD pipeline setup for SIT environment.
- 2. TEMS Tunneling and Excavation Monitoring System
- Application for instrumentation monitoring & alerting, excavation site activity tracking.
- Golang WebAPI, Vue JS frontend, PostgreSQL DB, AWS platform hosting.
- Centos to Redhat OS Migration.
- System maintenance and support.
- System enhancement and modification to cater new requirements.
- 3. Realtime-web
- In-house web-based application for instrument's data visualization. Project to port existing client program to web-based solution.
- Django backend, MySQL DB, GCP hosting.

- Core function development.
- Staging environment setup & CI/CD pipeline setup.

Sarawak Information Sdn Bhd Software Engineer March 2020 - April 2023 (3 years 2 months)

Kota Samarahan, Sarawak, Malaysia

Projects:

- 1. BSMS v2- Building Security Management System
- Web-based building access control and attendance system.
- In-house PHP framework, MySQL DB, private cloud hosting.
- System support and maintenance
- System deployment and setup.
- 2. BSMS v3 Building Security Management System
- Revamp of BSMS v2.
- Codeigniter 3, MySQL DB, private cloud hosting.
- Core function development.
- 3. USACS Unified Security Access Control System
- Fork of BSMS v2 for Sarawak State Government.
- In-house PHP framework, MySQL DB, private cloud hosting.
- System support and maintenance.
- 4. USACS 2.0 Unified Security Access Control System 2.0
- Revamp of version 1.
- Codeigniter 4 framework, MySQL DB, private cloud hosting.
- Core function development.

Education

University of Technology Sarawak

Bachelor of Computer Science In Software Engineering, Computer Software

Engineering · (2015 - 2018)
